SeeSnake® micro™ inspection camera

The SeeSnake® micro™ inspection camera makes it easier for you to perform visual inspections in hard to reach areas such as wall cavities, ductwork, utility boxes and hundreds of other dark, hidden spaces.

The unit is equipped as standard with a semi-flexible 90cm cable with a 9,5 or 17 mm imager head and can be extended to 9 metres and is water-resistant to 3 metres.

A hook or magnet for retrieving objects can be fitted to the imager head, or alternatively a mirror for inspecting from a different angle is also available.

Ideal small, lightweight inspection tool and **time saver** for the professional in general construction work, plumbing & HVAC work, repair and maintenance work, automotive work, to name but a few.

RIDGID® microEXPLORER™ inspection camera

The microEXPLORER™ allows you to offer more services and provides you with the tools you need to detect and diagnose the unreachable. The unit is equipped as standard with a semi-flexible 90 cm cable with a 17mm Automatic Self-Levelling (UP-IS-

UP) imager head, extensions available up to 9 metre distance and water-resistant up to 3 metre.

Ideal small, lightweight inspection tool, is a true **time saver** with **image and audio storage**.
