

Impact-BULL Inflatable Air Cushion System

IB04

Softens the blow

The Impact-Bull Inflatable Air Cushion fall protection system brings a new perspective of speed, convenience and adaptability to protecting your workforce on site.

Light, easily inflatable airbags not only make installation quick and easy, but vitally are also just as easy to move from building to building.

Easily inflated and deflated

Using a petrol or battery operated pump it takes just 30 seconds to inflate each Impact-Bull Inflatable Air Cushion that is then clipped to its neighbour to provide a collective yielding surface.

Each cushion has an inflated volume of 2150mm x 750mm x 750mm and they are linked together with quick release buckles.

- Easy to inflate
- HSE approved
- On-site training provided
- Low environmental hazard
- On-site space saving
- Low cost site-to-site transportation
- In case of puncture inner liner can be easily removed and replaced

Material

Outer	White Polypropylene
Inner	Polythene Liner
