A Service You Can Depend On

Smiths Hire have operated in the construction, infrastructure, industrial and facilities management markets for over 47 years. It's this depth of experience and accumulated knowledge that enables us to deliver not only a huge range of professional equipment, but also allows us to offer an unparalleled service, ensuring we can take the hassle out of hire.

This was recently recognised by our peers at the 2018 HAE Awards ceremony when we received the National Award for Plant, Tool & Equipment Hire Company of the year.

We believe our growth and long term success is down to a commitment to deliver a quality service, driven by the philosophy of putting the customer first and at the heart of everything we do. It really is about passing on added value to our customers.

Whether that's through multi million pound investments in the latest fleet of eco wagons, plant, tools and access machines or through VIP account management and reporting, we really do care about our customers and want to help them plan their project as cost effectively as possible.

With twelve conveniently located Hire It Centres across the region and four Training Centres offering a range of courses including IPAF and PASMA, we have got you covered.
