

A PERFECT CONNECTION: PAIR AND GO!

BMP 8500 - THE TRENCH ROLLER.

BMP 8500: the trench roller.

1

STABLE CONNECTION THANKS TO RADIO.

- Trouble-free operation even under difficult job site conditions
- Clear and secure pairing of remote control to machine
- All important functions at a glance thanks to clearly visible LEDs

2

SIMPLE RADIO REMOTE EXCHANGE.

- Remote control unit easy to replace
- Pairing a replacement radio remote done in seconds
- Any remote can be used with any machine, increasing flexibility when a replacement is needed quickly

3

TELEMATICS – TRACK YOUR MACHINE'S STATUS.

- As an option, the machine is just a mouse click away
- Monitor machine position and status, including error codes

4

FOR GREATER ON-SITE SAFETY.

- BOMAG Operator Safety System (BOSS) reacts immediately
- Machine stops reliably if it comes too close to operator
- Visual signal warns operator of risk of machine tipping
- Manoeuvring out of danger zone then possible

5

YOU COULD HARDLY ASK FOR MORE CONVENIENCE.

- Battery charge status clearly visible on remote control display
- Remote control with two batteries
- Second battery can be charged while remote controls machine with the first
- Total runtime of both batteries: 35-40 hours

6

ECONOMIZER. COMPACTION CONTROL MADE EASY.

- Light strips show compaction progress
- System warns against over-compaction and grain breakage while identifying soft spots in the soil
- Reduces number of passes by up to 25%

7

BETTER PROTECTION FOR LONGER SERVICE LIFE.

- Enclosed exciter housing prevents water and dirt from entering
- Rugged, well-thought-out design for tough everyday construction site operation
- Intelligent layout of hydraulic hoses - minimises repairs and keeps service costs low

8

QUICKLY WIDENED FOR ALL TASKS.

- Effortlessly widen or reduce working width from 610 mm to 850 mm
- Smooth drum optionally available
