JCB

100% electric. Zero emissions.

JCB is leading the way in clean technology and reducing harmful emissions. That's why we are introducing JCB E-TECH, a new generation of electric products with zero emissions at point of use that don't compromise on performance. The new 525-60E is the first of the electric generation and JCB's first fully electric compact telehandler. It lets you do your average working shift on a single charge*, giving you access to a whole new world of possibilities.

*Dependent on ambient temperature and working duty cycle.

LOW NOISE

Low noise levels make the new 525-60E ideal for working in urban areas, indoors, out of hours and operating in sensitive environments.

SAFER WORKING

No trailing tethers, zero emissions, low noise levels and other innovative features provide peace of mind for working safely and efficiently.

ZERO EMISSIONS

The new 525-60E compact telehandler is part of JCB's 100% electric E-TECH range, with zero emissions, less noise and zero compromise on performance.

ZERO COMPROMISE

Get the same high performance as a conventional machine with powerful lithium-ion technology. 24kWh battery powers an average working shift.

*Dependent on ambient temperature and working duty cycle.

REDUCED COSTS

The new 525-60E has considerably lower operating costs with maintenance-free batteries, minimal daily checks and less servicing.
